-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In this case, the abstract is less than the 50-word minimum.

2. The disclosure is objected to because of the following informalities: On page 3 lines 7-8, the phrase "A first blade 105, a second blade 107, and a third blade 109 that are shaped identically" is not an accurate statement. Figures 3A-C clearly show the 3 blades incorporate different shapes.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steffens (4,930,709) in view of Sontheimer (4,200,244). In regards to claim 1, Steffens discloses the invention including three arcuate blades (A, B, and C) mounted to a central shaft peripherally (9), the blades are separately attached to the shaft at different height levels (Fig. 2) and distributed in equiangular positions (Fig. 1 and Column 2 lines 64-66), and a convex side (2).

However Steffens fails to disclose a convex side of each blade forming a serrate knife edge. Sontheimer teaches a convex side of each blade forming a serrate knife edge (64). Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have provided Steffens with a serrate knife edge, as taught by Sontheimer, to allow for a more efficient cutting means.

In regards to claim 2, the modified Steffens reference discloses each blade is attached to the central shaft horizontally (Fig. 2).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Place, Schaller, Valbona, Gordon et al., Crescenzi et al., Marriere et al., Ekström, and Huang.
